THE SOUL OF THE COMPANY

Backed by almost 30 years of history, at Uecko we are fortunate enough to be able to devote our work to our true passion: wood and its infinite possibilities. We have developed our own signature style over the years, turning premium quality and the exclusive design and functionality of our wardrobes and dressing rooms into our trademark.

Through our love and respect for our main raw material, we craft pieces that are elegant, sustainable and most of all perfect for achieving the ambience you envision for your space. Our team of specialists and interior designers work together to come up with the designs that best respect this premium material to deliver the highest-quality products without losing sight of the latest trends.

OUR PHILOSOPHY

Passion, quality, design, service, innovation. our philosophy allows us to provide outstanding support for architects, decorators, interior designers, exclusive developers and more.

The vision that we have gained through our experience, our commitment to innovation and our team of specialists mean we design **custom solutions** for each project and provide a five-year warranty on all our models.

We offer a seamless combination of craftsmanship and cutting-edge technology to create the ultimate aesthetic solutions that are custom-made to fit your needs and projects.

HISTORY

When we first opened our doors in Madrid in 1993, our founder, Vicente Santiuste, decided to surround himself with the industry's top professionals. Each of these specialists boasted a proven track record and 20-plus years of industry experience. Together they built up our business culture and developed their own style rooted in high-quality, functional and made-to-measure designs. This culture has been maintained over the years and shapes the essence of who and what we are today.

Our growth, coupled with our commitment to working with only the best professionals, has given us the opportunity to work with market leaders across a range of sectors. One of the most outstanding examples is our almost 24-year partnership with the prestigious property developer: LAFINCA REAL ESTATE. Their luxury residences are a European benchmark in terms of quality and finishes. We are proud that they are committed to our company and to contribute to their projects with our designs.

OUR PRIMARY FOCUS AS WE CREATE **TIMELESS AND UNIQUE SPACES** IS TO SEAMLESSLY BLEND **BEAUTY** WITH **FUNCTIONALITY**.

WE CREATE DREAMS

We harness our company's inherent sense of elegance, sophistication and design when we create a space. Our mission to turn our experts' visions and designs into reality is what drives us. By combining our experience with their expectations, we manage to craft fully customised models that align with their vision.

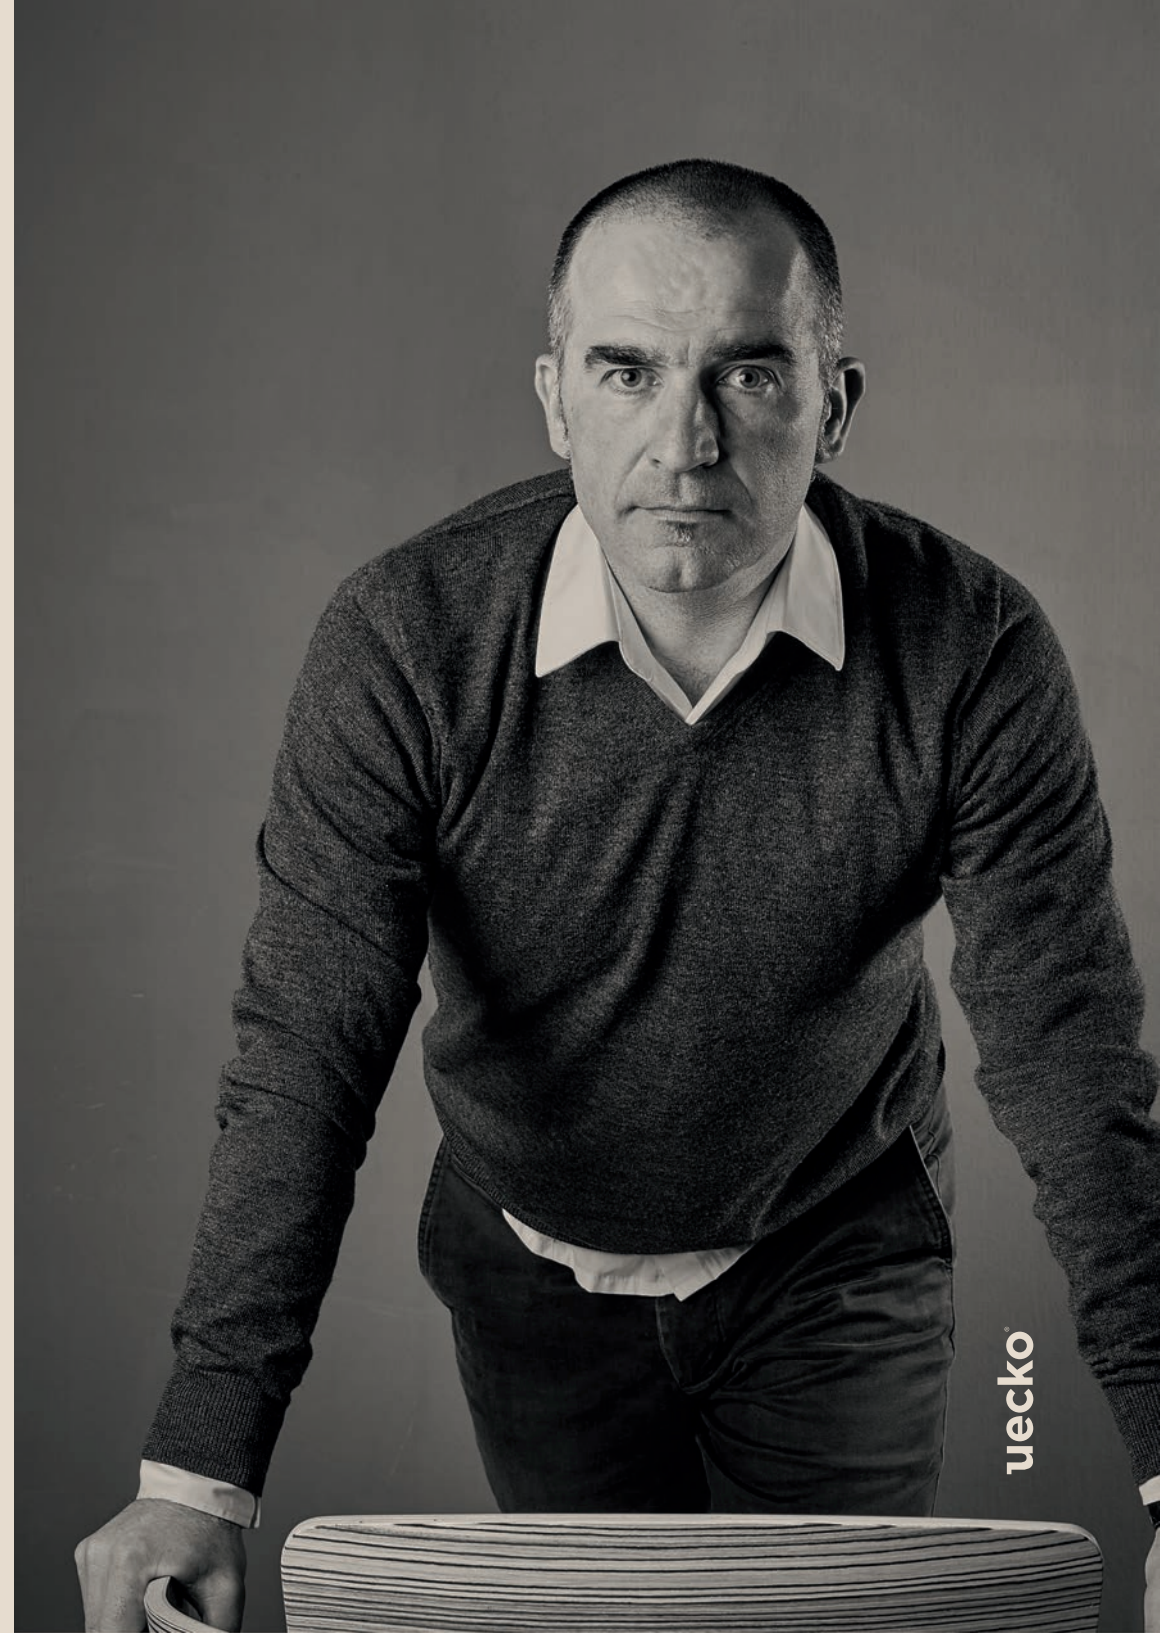

DESIGNERS

Design and setting ourselves apart with a truly unique product are vital to Uecko, which is why we have decided to bank on renowned designers who uphold the spirit of the company while revolutionising our models and the different options we offer.

Aitor García de Vicuña is one of Spain's most prestigious industrial designers. Founder of AGV Estudio, he started working with the brand in 2022, creating a new line called Nara, his style updating our existing lines.

Change has begun with Aitor.

FUTURE

The tremendous evolution of the company over the last few years, the challenge of incorporating future designers for the different collections, coupled with our technological development and commitment to sustainability, has produced unique projects and unforgettable experiences.

A major challenge to preserving our culture and the identity of each creation. Development and transparency go hand in hand with our values, team and projects.

All of this our past, present, and future has brought us together to learn and grow, turning the company into an industry benchmark and a leader in the design sector.

ESSENTIAL FURNITURE

The essence of our work is rooted in the wood and the way we craft it. Starting with the finest material, we transform it into custom-made pieces that reflect your personality. No two projects are the same, which means that no two results are the same. It is this unique touch that turns our furniture into a central piece in your home.
